Phase-1 Practice Project: Assisted Practice

7. Writing a program in Java to verify the implementation of inner classes

```java
package Mydemo;

class inner
{
    void show()
    {
        System.out.println("Outer Class");
    }
    static class inner1
    {
        void display()
        {
            System.out.println("Inner Class");
        }
    }
}

public class InnerClasses {

    public static void main(String[] args) {
        // TODO Auto-generated method stub
        inner h = new inner ();

        h.show();
        inner.inner1 t = new inner.inner1();
        t.display();
```

```
        }

}
```

```
Outer Class
Inner Class
```
